Why to participate in the Matchmaking?

The Free From Functional Food Matchmaking 2018 will help you find international business partners, research or technological collaboration in pre-selected B2B-meetings at the trade fair.

27 - 28 September 2018
Hamburg, Germany

WindEnergyMatch 2018

WindEnergyMatch 2018

is a dedicated brokerage session allowing the participants to expand their international network through scheduled one-to-one meetings during WindEnergy 2018, the world's leading wind industry expo.

- Added-value to your trade fair participation
- Discuss cooperation possibilities in an informal atmosphere
- Meet potential business partners
- Develop and strengthen business and research relationships

Select your meeting partners and confirm meetings via online catalogue prior to the event. Bilateral 30-minutes meetings will take place on 27th and 28th of September during WindEnergy 2018 in the matchmaking area (Hall B.7, Room B7.1, Upper Floor).

The Enterprise Europe Network

invites all exhibitors and visitors of WindEnergy Hamburg 2018 to participate in a b2b-matchmaking - WindEnergyMatch 2018.

In 2018 the fair and the brokerage event focusses on the following areas:

- On- and Offshore
- Manufacturers of wind turbines
- Components / suppliers
- New materials / composites / raw materials / supplies / material processing
- Installation
- Planning and project development

Kā izskatās un kā tā strādā?

The screenshot shows a web interface for 'Partnering Opportunities'. At the top, there is a navigation bar with 'Search', 'Sign in', and 'Help' buttons. Below this is a blue header with the title 'Partnering Opportunities'. The main content area features a search bar, radio buttons for 'Any word' and 'All words', a 'Compact View' dropdown, and a 'Search' button. Three filter panels are visible: 'Profile type(s)' with checkboxes for Business Offer, Business Request, Research & Development, Technology Offer, and Technology Request; 'Profile country of origin' with a list of countries including Albania, Argentina, Armenia, Austria, Belarus, Belgium, Bosnia and Herzegovina, Brazil, and Bulgaria; and 'Client requested' with an identical list of countries.

Details

Title:	Latvian producer offers innovative and mobile living micro houses
POD Reference:	BOLV20161114001
Summary:	A Latvian company specialised in production of boxhouses made of glass fibre with unique design is looking for distributors. The company is also seeking for manufacturing and services agreements with universities, guest houses, camping places and SOS children's villages' administrators as well as other companies that are dealing with housing services. The houses are fully equipped, ready-to-use and can be placed in almost any place.
Description:	The Latvian company is producing mobile living micro houses for universities, campings, private persons and specific project demands. The micro house can perform the function of living space, office, gym, garage, hobby room, hotel and camping houses, as well as sauna, garden kitchen, beauty salon, student dormitories, etc. House complies with EU standards, can be easily connected to electricity, water and sewerage systems. The building permit or creating a construction site is not needed. The client receives ready to live house, individually equipped and designed for comfortable stay with detailed manual on how to use it. The Latvian company is looking for distributors who would be interested to distribute the houses in Austria, Finland, Germany, Italy, Norway, Sweden and UK. As well as company is interested in manufacturing and service agreement with companies/organisations those are providing housing and accommodations in that countries. The offers from other countries will also be considered.
Advantages and Innovations:	The company is technology-oriented and uses the latest industry developments, such as thermal insulation materials, energy saving and recovery, climate control systems.
Stage of Development:	Already on the market

Details

Title:	A Belgian company is looking for manufacturers to produce an innovative baby chair
POD Reference:	BRBE20161125001
Summary:	A Belgian company is developing and marketing an innovative type of baby chair. They have already a prototype and are now looking for manufacturers to produce their product.
Description:	<p>This business request is initiated by a small Belgian company who just bought the design rights of an innovative type of baby chair. The product can be used at a normal kitchen table or at a high-kitchen cooking island. The company is looking to produce their baby seats outside of Belgium to reduce costs, therefore they are looking for the following partners:</p> <ul style="list-style-type: none"> - manufacturers who can produce the seat by using the rotational molding technique by filling a mold with PE-powder). <p>The Belgian company is offering a manufacturing agreement to the partner involved.</p>
Technical Specification or Expertise Sought:	<p>Soon additional information will be available and 3D-models will be ready for production. A trustworthy partner should provide prototypes first before the Belgian company decides on attributing higher volume batches.</p> <p>Volume expectations of first orders are:</p> <ul style="list-style-type: none"> - seats: 60 - footrest: 250 - legs: 500 - 1000 - metal plate: 250 - 500 - metal tubes: 500 -1000
Stage of Development:	Prototype available for demonstration
IPR status:	Design Rights

Dear Colleagues:

A Spanish research centre, collaborating in a proposal H2020-DT-ART-02-2018 is looking for cities with transit or other traffic modelling tools and are interested in testing new road scenarios developed during the execution of the H2020 project.

The project will make use of several technological systems and solutions in order to assess impacts, benefits and costs of connected, cooperative and automated driving systems.

Funding programme: DT-ART-02-2018 - Support for networking activities and impact assessment for road automation (RIA).

Expressions of interest are welcome before the 22 March 2018.

Duration of the project: 36 months.

In Denmark, 40.000 children experience difficulties keeping the stools. They suffer from fecal incontinence which causes them significant social issues and reduced quality of life. The condition often emerges from bad toilet habits, e.g. when school children hold on the stools an entire day due to not wanting to use the insanitary toilets of the school. To reduce the number of cases concerning fecal incontinence among children and thereby improving the quality of life among children and teenagers, this project is concerned with the development of new types of school toilet facilities. In practice this means the development of a new standard of hygiene-stations, development of a new standard urinal for boys, digital nudging and decoration of toilet rooms etc. A number of technical building recommendations concerning interior design and proposals of how to use products will be included.

They want to find relevant partners as primary municipalities or possibly university as soon as possible with interest and identification of defined problem in your country as well. They have deadline 15th of January, when 4 pages of Project Idea Form must be uploaded as well as budget and partnership.

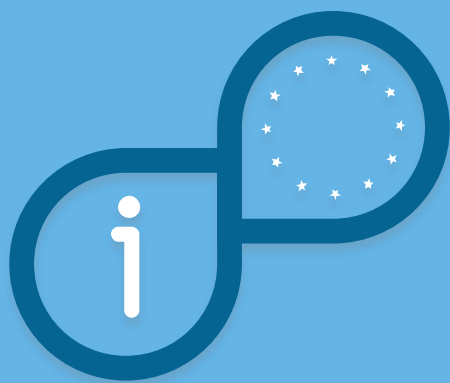

Project partners

- Vesthimmerlands Kommune (Municipality), Vestre Boulevard 7, 9600 Aars - Denmark (Leader)
- Aarhus Kommune, BØRN OG UNGE, Grøndalsvej 2, 8260 Viby J,
- "IWI TECHNOLOGY APS", Tjernevej 18, 2800 Lyngby (private company)
- "Bunker 43", Rantzausgade 41, 9000 Aalborg (private company)
- Skiltefabrikken "Tryk På", Rønbjergvej 78, 9681 Ranum (private company)

Project partners from the Baltic region with similar challenges are searched for. Typically it will be schools:

- Marks Municipality and i.e companies in Sweden
- Municipalities, university or companies from the 3 Baltic countries (to be announced)

Konsultācijas

- | **Praktiskā informācija par uzņēmējdarbību citās valstīs**
- | **Tirgus informācija**
- | **Informācija par likumdošanu un standartizāciju**
- | **Informācija par intelektuālā īpašuma aizsardzību**
- | **Uzņēmumu atgriezeniskās saites mehānisms**

Jautājumi:

Es plānoju atvērt uzņēmumu Polijā. Kādi nodokļi man būs jāmaksā?

Mēs plānojam eksportēt savu produkciju uz Franciju? Kā mums ir jāmarķē mūsu produkts? Vai ir specifiskās prasības?

Es gribu atvērt friziera salonu Norvēģijā. Kādas prasības man ir jāievēro?

Mēs esam noslēguši līgumu ar Austrijas uzņēmumu un mums jāveic 3 māju uzstādīšana Austrijā. Kādas prasības ir darbinieku nosūtīšanai darbam Austrijā?

Mums ir pasūtījums Norvēģijā un mūsu uzņēmuma darbinieks ir Latvijas nepilsonis. Kas man ir jā dara, lai mēs varētu nosūtīt šo darbinieku uz Norvēģiju?
